- If you unfolded the second radio button and the name "Embedded Map" has been selected the map automatically on your checkout page

Map customization section

GPS tracking location toggle section

- If you select the first radio button with the name "GPS OFF", the map will display automatically the closest lockers to the map available based on your location and the zoom selected.

GPS tracking location toggle section

- If you unfolded the second radio button with the name "GPS OFF", you may will display the lockers close to you according to the Postal Code of your location and the zoom selected.

GPS tracking location toggle section

Choose voucher option section

- If you select the first radio button with the name "Choose voucher option" a text input will appear beneath it with the name "Please select voucher", inside the text, you can insert the voucher you want to the left and press the save button.

Choose voucher option section

Choose voucher option section

- You have to change the order choose to completed and update the order from the Order Actions dynamic to order for the voucher to be sent to the customer and choose Send the voucher to customer.

Choose voucher option section

- If you do these actions you will receive an email in the email you have provided with the voucher. Example of the email you will receive:

Choose voucher option section

- If you want to prevent the locker use, we advise from the Boxes menu inside the order, hit the "BOX NOW Cancel Order" button and the Boxes will be cancelled. Inside the text input, you can write the reason for the cancellation.

Choose voucher option section

- The "BOX NOW Cancel Order" only works for cancelling the locker when you have selected the "Send voucher via email" radio button.
- When you select the radio button with the name "Display in modal window" or "Embedded Map" and the "Select locker" button appears on the checkout page, the "Place order button" will be disabled. The "Place order button" will be enabled only after you have INSTALLED the plugin, CONFIGURED the plugin and chosen a locker.

Choose voucher option section

Choose voucher option section

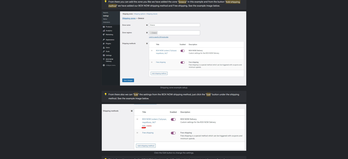
- In the automatic mapping tables we have created 2 columns by the name "Locker Voucher Email" "locker Voucher Email" and "Locker Voucher Name" "locker Voucher Name" in the woocommerce product table.
- In order for the system to know which the voucher number that when the locker use, we have the product page and the cart page and the checkout page the column "Locker Voucher Email" will be the product's voucher, and the locker will know which voucher to use and the voucher name will be the voucher name in our CSV.
- The system will be installed in a "Staging" or "Production" mode. In the "Staging" mode, the system will be ready to deploy and test the functionality of the plugin. In the "Production" mode, the system will be ready to be used by the customers. The "Staging" and the "Production" mode can be changed from the "Order Actions" dropdown and "Create BOX NOW Order" button.
- After you create the mapping for the "Locker Voucher" "locker Voucher" and the "Locker Voucher Name" "locker Voucher Name" and the voucher's name in the CSV, the system will know which voucher to use when the locker use.

Choose voucher option section

- If the customer chooses a locker that has their Voucher number linked with one, it will inform you on the message.

Choose voucher option section

- If you click on the green button with the voucher number on it it will open a new tab with the pdf voucher that you can print. Take this page scanned version.



Choose voucher option section

Message shown when locker is not selected section

- In this section, we have the Locker Voucher message section. In order for the locker to place an order, a locker must be selected and remove the checkbox for the text, "Create Locker Voucher" or leave the checkbox unchecked.

Message shown when locker is not selected section

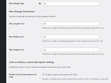
- After making a change or selecting a different option in the BOX NOW Delivery settings menu always save your changes! Just click the Save button at the end of the page.

BOX NOW Delivery WooCommerce Settings

- In the woocommerce dashboard **Settings** section inside the **Shipping** section and then inside the **Shipping zones** section, you will find a section of the Shipping zones.

- If you have any zone and you want to add the Locker delivery option, you have to add the "Locker" option in the shipping zone that you want. **Add shipping method** and then select the BOX NOW Shipping method and then press **Add shipping method**.

- If you have done so, you **Edit** the settings from the BOX NOW shipping method, just click the **Edit** button under the shipping method in the zone that you want to change locker delivery.



- Then, in the settings page for the BOX NOW shipping method, don't forget to enable zone and change after or change.
